Experience

Career break

Aug 2024 – Aug 2026

- Laid off in 2024, I lost my right to work for 2 years while waiting on permanent residency. I used this time to sharpen my skills and work on personal projects. [Read the full story](#)

Product Designer, [Petal Solutions Inc.](#), (Montréal, CA)

Mar 2021 – July 2024

- Redesigned a rules engine through auditing, mapping, and synthesis, cutting rules from 24 to 9.
- Resolved a recurring interface error caused by an unclear selection step in a newly launched feature, reducing accidental service exclusions.
- Designed concepts and features within a regulated domain, from requirements gathering, through interface design, prototyping, to production-ready delivery, for continuous improvement across Petal's HUB (a government-mandated system deployed province-wide) and Scheduling tool, while helping shape the design team's processes, documentation, and design system. [See project](#)

UX Designer, [Fit-plans](#), (Montréal, CA)

Mar 2020 – Aug 2020

- Redesigned the product page, checkout, calorie calculator, and landing page as the **sole-designer** through audit, collection and analysis of user needs, then usability testing, reducing the ordering flow **from 6 to 3 steps**. [See project](#)

Project Manager / Designer, [Gekko Group](#), (Levallois, FR)

Oct 2017 – Sep 2019

- Designed and continuously improved various functionalities for the Teldar and Miles Attack platforms, through process analysis, collection of customer needs, and drafting of technical specifications.
- Implemented a points-based loyalty rewards system, traveler-review collection, offer comparator, and a cross selling workflow; Adapted the platform to GDPR regulations.

Project Manager / Designer, [Eurokera](#), (Bagneaux, FR)

Sep 2016 – Sep 2017

- Redesigned the company website in collaboration with an external agency.
- Redesign of the intranet through requirements gathering, analysis, mapping, prototyping, and UI design, documenting components in a Design Kit.
