About me

I figured your eyes might need a break from resume-skimming,
so here's a quick crossword to mix things up :)

- Design practice of the Near Future seen in Her, Black Mirror, or Pantheon.
- Satoshi Kon's "Perfect" hue, also a "Tako Tsubo" anomaly and Zima's Netflix shade.
- Martinican pioneers of Zouk formed in 1979, debuted with "Love and Ka Dance."
- "Hotel California" bird or the "Great" nickname of Khabib Nurmagomedov.
- Palindromic blockbuster centered on entropy.
- French "Free" internet provider founder who shook up the telecom industry in 2012.
- Posthumous "Samurai Champloo" collaborator and godfather of Lo-fi hip hop.
- 331 Avenue du Mont-Royal E, Montréal, QC H2T 1P8.
- Four-stringed centerpiece of "Dean Town", "Space Cowboy", "Magnolia" or "It don't matter".
